17th International Symposium on the Interaction of the Effects of Munitions with Structures

17th ISIEMS
October 16 – 20, 2017
Dorint Parkhotel, Bad Neuenahr, Germany

The symposium builds on previous meetings held in the United States of America (organized by Defense Threat Reduction Agency) and Germany (organized by Federal Office of Bundeswehr Infrastructure, Environmental Protection and Services). It will address all aspects of the response of civil engineering structures and materials to explosive loading.

Scientists, engineers and other experts or personnel working in the technical areas of interest are invited to participate in and contribute to the symposium.

Papers for the symposium are expected to fall into the broad topic area of weapon effects, structural and equipment response, and material and structural modeling.

The **conference fee** of 470 Euro (€) includes:

- Access to technical sessions during the symposium and proceedings,
- Ice Breaker on October 16,
- Coffee Breaks and lunch buffet during conference,
- A Dinner on October 18,
- Two special events.
